CSE7302 - INTERNSHIP

Review-2 Presentation

TITLE OF THE PROJECT / WORK ASSIGNED / DOMAIN

Student Details	
Name	Puneeth CN
Roll No	20221CSE0740
Section	8CSE13

Under the Supervision of,

Dr./Mr./Ms./Prof. Syed Mohsin Abbasi
Professor / Associate Professor / Assistant Professor
Dr. Sampath A K
Presidency School of CSE
Presidency University

Name of the Program: BTECH COMPUTER SCIENCE ENGINEERING
Name of the HoD: Dr. Asif Mohammed
Name of the Program Internship Coordinator: Mr. Sakthi S
Name of the School Internship Coordinator: Dr. Md Ziaur Rahman

Content

- About Company or Organization
- Working domain or the technology
- About your team and reporting Manager
- Challenges Faced in Internship
- Objectives of the work
- Literature Review
- Proposed System
- Problem Statement
- System Requirements
- Advantages of Proposed System/Work
- Internship Roadmap
- Github Link

About Company : Prinfio Tech

- **Prinfio Tech** is a technology-driven IT company located in **Yelahanka, Bengaluru, India**, one of the major technology hubs of the country. The organization is guided by experienced technical professionals with a strong focus on practical learning, innovation, and skill development.
- Prinfio Tech specializes in cloud computing training, software development support, and automation-oriented solutions that help students and organizations enhance technical efficiency and industry readiness.

Products & Services

- **Our Offerings**
- Cloud Computing Training and Solutions (AWS)
- Python Programming and Automation
- Data Collection and Processing Solutions
- Software Development Support
- Technical Training and Internship Programs
- Prinfio Tech focuses on providing industry-relevant so

Working domain Cloud Computing (AWS)

- During the internship, my assigned working domain is **Cloud Computing using Amazon Web Services (AWS)**, supported by **Python Programming**.
  This domain focuses on understanding cloud infrastructure, basic AWS services, and applying Python programming concepts to perform **data collection and processing tasks**.
- The work involves writing Python programs, using logical conditions and functions, and preparing systems that can be integrated with cloud-based environments.

About your team and reporting Manager

- During the internship, I worked as part of an **8-member team**, where each member was assigned to **different technical domains**.
  My assigned domain was **Cloud Computing using Amazon Web Services (AWS)**.
- The team functioned under the leadership and guidance of the **CEO** and a **Team Leader**, who coordinated tasks, provided technical direction, and monitored overall progress.

Challenges Faced in Internship

- Internship search process
- Interview preparation
- Adjusting to the team
- Adapting to a new work environment
- Learning new technologies
- Time management
- Improving communication skills
- Developing technical skills

About your team and reporting Manager

- Our team worked collaboratively on the assigned tasks, where each member contributed based on their respective technical domains. My responsibilities were focused on **AWS Cloud Computing**, which included:
- Learning basic AWS services and concepts
- Supporting Python-based data collection tasks
- Reported to **Team Leader Santhosh Reddy** under the guidance of **CEO Prasanth**, ensuring timely reviews and task completion.

LiteratureReview and Problem Statement

- **Literature Review**
- Studied AWS official documentation and tutorials
- Referred Python programming learning resources
- Reviewed basic data collection techniques
- **Problem Statement**
- Manual data collection is time-consuming and prone to errors. There is a need for an automated and efficient data collection system using Python, which can be integrated with AWS cloud services.

Advantages of Proposed System/Work

- Reduces manual effort and errors
- Improves data accuracy and reliability
- Saves time through automation
- Easy to maintain and modify
- Scalable using AWS cloud services
- Enhances technical and practical learning
